

Features: \_\_\_\_\_

One-wire installation - power, video, and audio share one coax when the signal is modulated

When modulated, combines all camera signals with existing TV channels, viewable on multiple TVs

LED indicates an active camera

Supplies DC power across the coax cable

Supports up to four cameras

Must have open, tunable channels available

Mounts in single size module space for Stellarplex systems

Technical Specifications: \_\_\_\_\_

Forward bandwidth ..... 54 Mhz - 1000 Mhz

Forward gain/loss: ..... 54 Mhz - 1000 Mhz ..... -8 dB +/- 3 dB (+/- 2 dB\*)  
*\*If unused ports are DC blocked and then terminated.*

Isolation ..... 7 - 8 dB (7-10 dB if all ports used)

Maximum current draw ..... 1 amp total of all four ports

Used with the Stellarplex Power Distribution Module.
